i but the educational systems in the elittle world	_
the lens, hoping that they can find quick pedag	
solutions that can help countries to shi	_
online/hybrid learning. the purpose of the present	paper
is to shed light on online/hybrid learning i	
Algerian EFL context through exploring tea	
perceptions. To achieve this aim, the resea	
administered a semi-structured questionnaire	
EFL teachers from Saida University and Ma	ighnia
University Centre. The findings revealed that te	_
have a positive perception towards the u	se of
online/blended learning, the use of educa	itional
platforms like Moodle, Massive Open Online Co	urses,
and social media. The findings indicated that	at the
teachers reported that online learning is benefic	cial in
terms of autonomous and effective learning. How	
the results revealed some constraints facing tead	chings
such as internet connection, time, lack of training	g, and
students' lack of motivation.
